Leading Japanese Dietary Supplement Line To Support Expanding Nutricosmetic Market

RALEIGH, N.C. -- Given the growing demand for high quality nutricosmetics in the United States and Canada, AMPG, LLC, and PS Corporation of Tokyo, Japan, announced today the launch of the much sought-after S•ONE•S brand of enhanced collagen dietary supplements. S•ONE•S is one of Japan's leading premium collagen brands, with the original S•ONE•S having been on the market now for more than 20 years.

Through a unique blend of premium hydrolyzed collagen, the finest sources of chondroitin, glucosamine, hyaluronic acid and essential vitamins, S•ONE•S provides a pure, natural formulation that contains no artificial flavorings, preservatives, or sweeteners.

Japan, long the leading nutricosmetic market in the world, continues to drive what is forecast by some to be a \$4 billion worldwide market in the next 4 years. There, collagen based products, and dietary supplements in general, are a normal part of everyday food and drink, with the results literally seen in men and women of all ages.

“With the entire management team having spent many years in Japan, we experienced firsthand many of the culture's 'secrets', including the health and beauty benefits of a collagen supplement”, stated Mr. Gregory Mills, President of AMPG. He added, “We're proud to bring the S•ONE•S line to North America, so those here may enjoy the same rewards.”

“In my opinion, there isn't a finer collagen supplement available, with S•ONE•S combining the highest quality, most desirable ingredients, and lowest cost per gram. Our mission is to provide not only the finest Japanese collagen supplements, but also the greatest value to our customers, through exceptional quality and service”, added Mr. Mills.

Collagen is the most abundant, naturally occurring protein in the body. It is a main component of connective tissue, making up about 30% of the whole-body protein content. When consumed daily, either mixed with liquid or food, S•ONE•S collagen powders provide the human body with the building blocks to help build and maintain a healthy, firm, hydrated skin structure, and are an excellent source of nourishment for bones, joints, tendons, ligaments, and cartilage.

S•ONE•S products are available immediately through the company's website, at www.sonescollagen.com. The company is also actively pursuing retail, distribution, and logistics partners throughout North America, and can be contacted for more information.

About AMPG

Founded in 2011, Advanced Materials and Products Group (AMPG), LLC, is a privately held distribution company, exclusively supplying the S•ONE•S brand, and other PS Corporation dietary supplements in North America, through online and retail networks.

S•ONE•S products include the flagship S•ONE•S enhanced collagen supplement, as well as the newer S•ONE•S G Plus, created with the same pure collagen and essential vitamins of the traditional S•ONE•S,

with the additional benefits of chondroitin, glucosamine, and hyaluronic acid.
